Reshaping the future of ethnobiology research after the COVID-19 pandemic <https://www.nature.com/articles/s41477-020-0691-6>

Renata Soukand: Taming the pandemic? The importance of homemade plant-based foods and beverages as community responses to COVID-19
<https://ethnobiomed.biomedcentral.com/articles/10.1186/s13002-020-00426-9>

Renata Soukand: Re-written narrative: transformation of the image of Ivan-chaj in Eastern Europe <https://www.sciencedirect.com/science/article/pii/S2405844020314766>

Cassandra Quave/ Renata Soukand: Great source of digitized historic medical texts - lots of herbals: <https://www.biodiversitylibrary.org/> www.archive.org

Harriet Gendall: 'Who Feeds Us' - A great podcast series exploring stories of UK farmers, growers, community leaders, chefs, beekeepers, etc. in response to questions of food sovereignty, food supply and nourishment during the pandemic <https://farmerama.co/uk/who-feeds-us/>

Tess Holderness: Yes, very good opportunities to link back to ecosystem restoration ... <https://www.decadeonrestoration.org/>

Inge Kujper: This is a good community in the Netherlands <https://observation.org/apps/obsidentify/>

Cassandra Quave: These are such great ideas - thinking locally (to the location of the student) also has value! There is much we need to document and learn in the scope of urban ethnobotany, food security, food sovereignty. I also love this return to fermenting as a means of ingredient transformation and food preservation - whether it concerns sourdough bread, lactofermented vegetables, brewing, etc. I've written about this concept of ethnozymology here: http://etnobotanica.us/wp-content/uploads/2018/07/2014-Quave_and_Pieroni-JoE.pdf

Cassandra Quave: <https://www.inaturalist.org/> could be a useful resource for identifying plants without access to herbarium

Baiba Pruse: Adding on inaturalist, more on Citizen science activities: <https://eu-citizen.science>

Baiba Pruse: A bit an example of herbarium&diaries: <https://herbaria3.org>

Sonia Peter/Cassie Q: <https://foodperiodictable.org/>

If anyone is in the NYC Area, I work with a mutual aid network in Brooklyn that is working on food security issues in our mostly immigrant neighborhood. I'm not an ethnobotanist and we don't have any working on our team but we are starting a small garden and could use more volunteers in a few different roles!
